## BENCORE è socio di member of GBC Italia

Green Building Council Italia is a nonprofit association, branch of USA Green Building Council, a company promoting the LEED independent certification system - Leadership in Energy and Environmental Design. LEED is an internationally recognized certification system, providing third-party verification that a building or community has been designed and built to meet specific environmental standards. The Green Building Council Italia is a member of the Green Building Council Italia, which is a non-governmental organization that promotes sustainable development through the LEED certification system. The Green Building Council Italia is a member of the Green Building Council Italia, which is a non-governmental organization that promotes sustainable development through the LEED certification system.

## FABRICATION

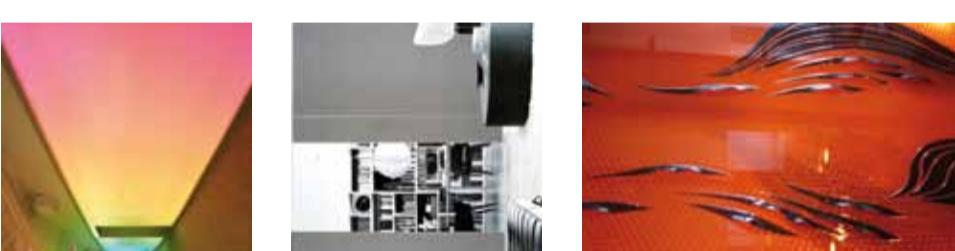

Tutti i prodotti Bencore possono essere lavorati e tagliati a misura secondo le necessità, curvati e bordati. Si possono realizzare cubi e altre forme geometriche. Bencore ha creato per i propri pannelli diversi sistemi di installazione, fra cui una porta scorrevole che privilegia qualità ed estetica. Altri sistemi di scorrimento possono essere utilizzati con i prodotti Bencore data la flessibilità nelle dimensioni e spessori dei pannelli.

Bencore ha messo a punto un prodotto specifico per la realizzazione di pavimenti sopraelevati retroilluminati, Starlight Floor che può essere installato su un apposito supporto 1mtx1mt.

Bencore ha sviluppato un prodotto specifico per prestazioni acustiche, Lightben Acoustic ideale per la progettazione di controsoffitti retro-illuminati, pannelli divisorio trasduttore e investimenti per pareti dove le prestazioni acustiche sono essenziali. Per informazioni tecniche consultare il Manuale Prodotto sul nostro sito internet [www.bencore.it](http://www.bencore.it)

All Bencore products can be worked and cut according to specifications, bent and edged. Cubes and other geometrical shapes can be manufactured on its panels with focus on quality and aesthetics. Many other sliding door systems can be used without any problem with all Bencore panels. Bencore created a specific product for back-lighted raised floors, Starlight Floor with a support system of 1mt x 1mt which is included in the Bencore products range. Bencore has developed a product ideal for environments where acoustic performances are required, Lightben acoustic to enhance acoustic performances in interiors, back-lighted acoustic false-ceilings, translucent partition walls with acoustic performances.

For technical information please see our Product Manual on [www.bencore.it](http://www.bencore.it)

## ENVIROIMENT

### ARCHITECTURAL

### INDUSTRIAL

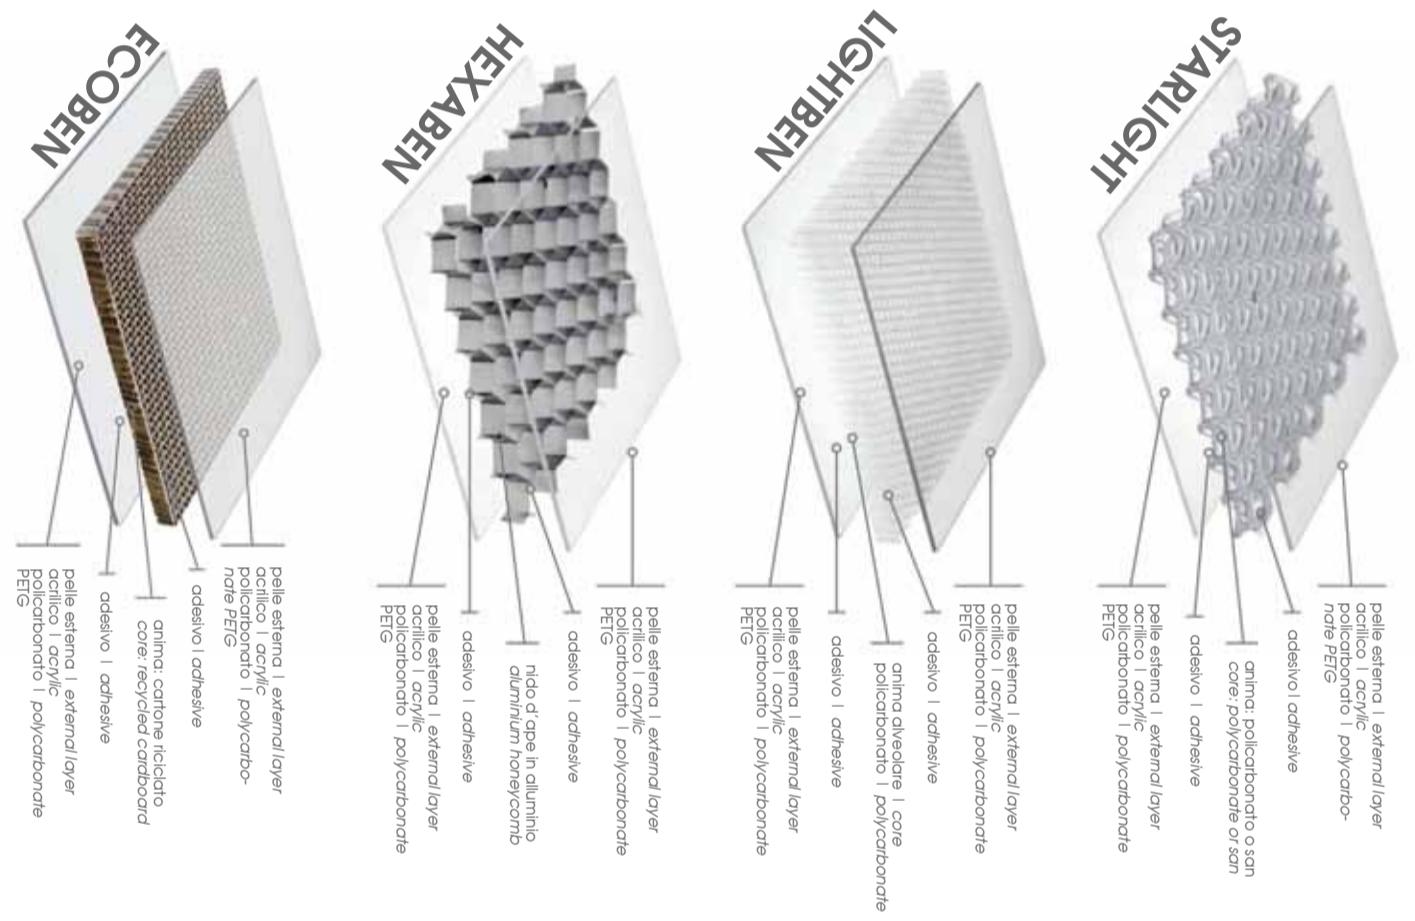

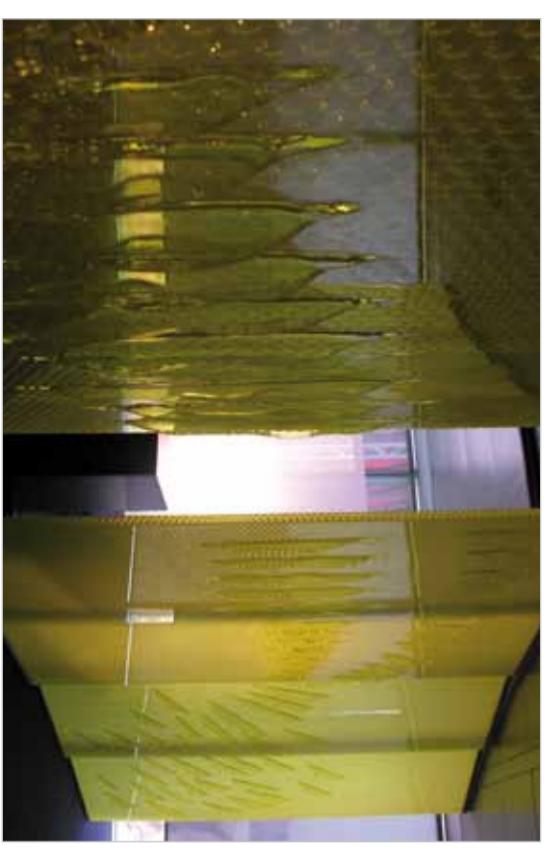

Tecnologia ed Ecologia da sempre sono i principi ispiratori della produzione Bencore. I pannelli Bencore sono tra i pochi prodotti in cui tecnologia, ecologia e design si conjugano perfettamente offrendo un abbinamento di prestazioni meccaniche, leggerezza, trasparenza, colore uniti ad una forte caratterizzazione estetica che, nonostante i tentativi di imitazione, li rendono unici nel loro genere.

La gamma dei prodotti Bencore è frutto di un'attività di ricerca e sviluppo tutta italiana nel campo delle tecnologie di avanguardia nel settore delle materie plastiche. Trasparenza, prestazioni meccaniche, leggerezza, efficienza energetica, di logistica e di installazione, riciclabilità dei materiali e risparmio di materia prima fino al 50% rispetto a prodotti correnti, fanno sì che i prodotti Bencore rappresentino un fondamentale passo in avanti sul mercato dei prodotti per l'architettura d'interni.

**Technology and Ecology** have always been the inspiring principles of Bencore production. Bencore panels are among few products where technology, ecology and design are perfectly mixed coupling mechanical properties, light weight, translucency, colours and a strong aesthetic quality, features that make Bencore products unique of their kind in spite of many attempts of imitation.

Bencore products range is the result of an all-italian R&D activity using forefront technologies in plastic materials production. Translucency, mechanical properties, light weight, efficiencies in energy, logistics and installation, use of recyclable materials, and saving up to 50% of raw materials if compared with competitors, make Bencore products a milestone on the market of products for interiors architecture.
